

**Figure 5.6 Peak Period Travel Time Tax (Measured by the Inrix Index)**

**Why is it important?**

INRIX data combines real-time data from traditional sensors and over 4-million GPS-equipped vehicles to develop a database of traffic speeds and major traffic events. The Inrix Index (formerly the Travel Time Tax) effectively conveys the concept that traffic harms economic activity and vitality in a region.

**How are we doing?**

The data indicates that Hampton Roads has the fourth worst peak period travel time among competitor regions.
